

```
function alice {  
    int t0 = gettimeofday();  
    while (true) {  
        for i = 0 to 106 {  
            // do some work...  
        }  
        int t = gettimeofday();  
        print(t - t0);  
        yield();  
    }  
}
```
